

Our K-LOVE radio station is always a positive experience. This is very encouraging in this mostly negative society. Most any other station I tune in to has a lot of sexual connotations and negativity not only in the commercials and news but in the music especially! I implore you to allow stations such as K-LOVE to keep broadcasting for our children's sakes! If this station and others like it are displaced then I feel as if our choice of free speech is going to be seriously compromised. K-LOVE is a much needed light in this too often dark world.
